

ALL FIBRE TEXTILE RINSE

FOR PROFESSIONAL USE ONLY

An acid rinse to neutralise high alkaline detergents. Especially good for stabilising possible unstable dyes i.e. oriental rugs, metallic dyes etc. Leaves fibres soft and safe wherever colour bleeding might be a problem.

TIPS

For oriental rugs and carpet

For portable equipment add 180ml (1:21 dilution) to each 4L of plain water to rinse after shampooing with Chemspec Oriental Rug Shampoo, or as the final step to cleaning carpets.

For truck mount equipment, add 2L per 19L of water.

For upholstery

Voor in de sproei-extractie machine voeg 120 ml toe aan elke 4 liter gewoon water om de stof te spoelen als laatste stap in een nat reinigingsproces. Kan als laatste stap op het oppervlak worden gespoten om bruinkleuring te voorkomen of om kleurstoffen te stabiliseren.

For urine deposits

Mix 180ml of All Fibre Textile Rinse per 4L of water and spray area until saturated. After 10 minutes clean area with a hot water extraction system preferably using an enzyme product like Chemspec Prekleen. Then deodorise fabric with Chemspec Kill Odour.

**ALWAYS PRE TEST
AREAS TO BE TREATED**

What does it do?

Removes residues

A mildly acidic rinse will remove most residue helping to restore a softer hand and more luxurious feel after wet cleaning.

Stabilises dyes

All Fiber Textile Rinse verlaagt de algehele pH in textiel en helpt kleurstoffen te stabiliseren.

Neutralise urine deposits

The developing alkaline salt deposits of aging urine can be effectively neutralised with All Fibre Textile Rinse. All Fibre Textile Rinse is effective in dissolving urine residue prior to deodorisation.

Reduces browning

By removing alkaline residues and lowering the pH of a rinsed item, browning can be effectively prevented. May be used as a final rinse or as an additive to lower the pH of a ready-to-use cleaning solution.

CHARACTERISTICS

ALL FIBER
TEXTILE RINSE

pH @ use : 2,5 - 3,5
Coverage : up to 1300 m² per 5 L
Dilution : various
Appearance : clear liquid
Fragrance : spice
Packaging : 5 L
