

EncapBrite II

FOR PROFESSIONAL USE ONLY

The ONLY Low Moisture rotary bonnet cleaning detergent you will need. EncapBrite II all new cleaning technology incorporating micro emulsions and micro polymers boosted with carpet safe hydrogen peroxide to rapidly emulsify soils encapsulating them for easy vacuum removal.

i TIPS

Dilution Rates

Mix 400ml of EncapBrite II with 4 litres hot, warm or cold water. All cleaning is improved with warmer water if available.

Meets all VOC emission standards.

Apply to carpet using machine manufacturers recommended use instructions.

What does it do?

Clean and protect

Now you can low moisture clean and protect the carpet in one step using your preferred low moisture cleaning process. Our new polymers quickly turn the encapsulated soils into a dry powder while at the same time penetrating the fibre providing lasting protection from oil, water and dry soil.

Faster cleaning and drying

Faster cleaning, faster drying, better encapsulation and longer carpet protection all in EncapBrite II.

Neutral pH reduces browning

EncapBrite II has a neutral pH, will not brown and will not leave surfactant residues that contribute to re-soiling and carpet yellowing. Effectively removes surface soils, beverage stains such as coffee, tea and soda from the surface as well as light ball point pen ink, greases, oils and tars.

CHARACTERISTICS

ENCAPBRITE II

pH @ use: 6.0 - 7.0

Coverage: variable

Dilution: 400ml to 4 litres water

Appearance: light yellow liquid

Fragrance: low odour

Packaging: case 4 x 3.78 Ltr

**ALWAYS PRE TEST
AREAS TO BE TREATED**
